## Education

### CUNY College Of Staten Island

Expected May 2026

Bachelor of Science in Information Systems Science (GPA: 3.4 / 4.00)

New York, New York

- **Relevant Coursework:** Business Data Structures and Algorithms (python), Prob & Stat in CS (Python), Intro to CS I (C++), Calculus I/w computational programming(julia)

## Experience

### Headstarter Ai

July 2024 – August 2024

Software Engineering Fellow

Remote

- Developed and deployed multiple applications, enhancing my technical proficiency and project management skills.
- Gained valuable experience working in collaborative team environments, contributing to successful project outcomes.
- Learned and utilized advanced tools, significantly broadening my technical knowledge and expertise.
- Focused on achieving key performance goals, such as acquiring 1,000 users or generating 1,000 dollars in revenue.
- Practiced interviews with a sophisticated AI-powered interviewer, refining my communication and problem-solving skills.

### Codepath Web development Bootcamp

March 2024 – June 2024

Web Developer Fellow

Remote

- Learned the fundamentals of responsive web development, laying a strong foundation for building adaptable websites.
- Gained hands-on skills through practical experience, supported by reliable learning materials.
- Developed a desktop web application aimed at addressing global hunger and poverty, showcasing my commitment to social impact through technology.

## Projects

### The Jesus Foundation | Html, Css, Javascript

- Used HTML, CSS, and JavaScript to build a website with stunning visuals, enhancing user engagement and experience.
- Implemented scroll animations using ScrollReveal.js, adding dynamic effects to the website's design.
- Recognized as one of the top students, with my application chosen to present in a cohort of over 300 students.

### Digital Kitchen | Next.js, React, Material ui, Firebase

- Developed a CRUD application for inventory tracking, allowing users to add, delete, and edit categories and items.
- Implemented authentication using Firebase, enabling users to log in or sign up to access the application.
- Tracked and collected data using the Firebase database, ensuring seamless and secure data management.

### Project Name 3 | Html, Css, Javascript

- Developed an application for a small business, collaborating with the owner to add key features that effectively showcase the business.

## Skills and Affiliations

**Languages:** Html, CSS, JavaScript, Tailwind CSS

**Affiliations:** Rewriting The Code (RTC), Colorstack, Women in Tech, Codepath, Headstarter AI
